

REMARKS

Responsive to the Notice of Drawing Inconsistency With Specification, mailed May 29, 2009 (the "Notice"), directing the Applicant to address informalities identified in the instant application, an amendment has been made to the specification of the application in cooperation with the Examiner.

The Notice indicated that Figure 3 contained in the drawings but is not listed in a Brief Description of the Drawings section of the specification.

Upon consultation by telephone with the Examiner on June 9, 2009, an Examiner's Amendment was filed in this application on June 11, 2009 responsive to the Notice.

The Examiner's Amendment, amending the specification to include a section containing a Brief Description of each of the drawing figures including Figure 3, is believed to obviate the objection to the application raised by the Notice.

The Examiner's Amendment further amends the specification to include section headings consistent with MPEP § 608.01(a).

None of these amendments introduce new matter into the specification.

Based on the foregoing, it will be apparent that Applicant has fully responded to the Notice of May 29, 2009 and

that the application is in condition to proceed to patent. In view of this, Applicant respectfully requests withdrawal of the objection raised by the Notice and early passage of the application to issue.

In the event that there are any questions relating to this amendment or to the application in general, it would be greatly appreciated if the Examiner would telephone the undersigned attorney concerning such questions so that the prosecution of this application may be expedited.

The Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit Account No. 25-0120 for any additional fees required under 37 C.F.R. § 1.16 or under 37 C.F.R. § 1.17.

Respectfully submitted,

YOUNG & THOMPSON
